

During my study at IIT-Hyderabad, I have never thought I would get admission in Tokyo Institute of technology which is one of the top schools in the world and with a prestigious scholarship (JICA).

Here is how the whole application process which went on for around 6 months.

On 9th December 2017, I got an opportunity to interact and share my research interest with Prof Eiichi Sasaki from Tokyo Tech at IIT-Hyderabad then I have decided to apply for JICA-FRIENDSHIP scholarship of IIT-Hyderabad. After the screening of application and interview, I got selected for JICA-FRIENDSHIP scholarship in February 2018.

Next step is university application. The application deadline for Tokyo Institute of technology, international graduate program(c) is April 18th, 2018. The admission decision is based on application screening and online interview. I have submitted my application to JICA and thanks to JICA for sending my application to Tokyo.

My interview is scheduled for May 21st, 2018. It was more like a casual discussion. The interviewing panel was very welcoming and that made me feel comfortable to take the interview without any fear. I have answered all the questions with confidence. My interview lasted for around 45 minutes. I would say it was a wonderful interview.

On June 13th, 2018, I have received the confirmation of my admission to the Master's program at Tokyo Tech commencing on September 2018.

I would like to take this opportunity to thank my college IIT-Hyderabad for providing me with a platform to pursue my dream, JICA supporting my higher studies by providing the scholarship, my project guide Dr.Surendra Nadh Somala, Dr.Anil Agarwal for recommending me to Tokyo Institute of Technology, my seniors Avinash Ramachandruni and Sai Charan, my classmate Sai Ganesh, family and friends for guiding and supporting me.
